| Included                | English installation manual and all assembly hardware  |

## WHAT YOU NEED ON SITE

- A level pad or compacted base for the ring
- A licensed electrician to connect the 230 V single-phase drive
- A forklift, telehandler or tractor with forks to unload the crates

- 2 to 3 people for assembly
- A clear square of about 46 ft for the 4-horse ring or 56 ft for the 6-horse ring

## **DELIVERY**

Freight, US customs duty and curbside delivery to the lower 48 are included in the listed price.

Curbside means the truck stops at the road or the end of the driveway. You need equipment on site to unload.
